*"I have been lecturing at the WTI for many years and each time it is a real intellectual pleasure. What makes the WTI's offering unique is the interdisciplinary approach to the study of international economic governance. Students get to study not just the law, or economics, or politics of international economic relations, but the law **and** economics **and** politics of international economic relations. This prepares them well for a career as a practising lawyer or for a career in academia."*

Expect vibrant discussions and the chance to find a fulfilling job in the international trade arena. My firm keeps hiring young lawyers from the WTI and we have never been disappointed!"
